***MRT Hosts Drone Survey Mapping Lunch Networking to Strengthen Industry  
Collaboration***

**Dili, 12 February** – Murak Rai Timor, E.P. (MRT) successfully hosted the **Drone Survey Mapping Networking Lunch**, bringing together key industry stakeholders to introduce MRT’s drone services and their applications in survey mapping. The event served as a platform for quarry operators, consultants, and clients to exchange insights, explore innovative solutions, and strengthen professional networks.

A key highlight of the gathering was a presentation by **José Goncalves, President and CEO of MRT**, who provided valuable insights into the company’s vision and initiatives. This was followed by a presentation on **drone survey mapping** by an MRT drone specialist, showcasing the technology’s capabilities and benefits. The event also acknowledged the **Autoridade Nacional dos Minerais (ANM)** for its role in supporting regulatory compliance and ensuring the safe integration of drone technology into industry practices.

**“We are committed to leveraging drone technology to enhance precision and efficiency in survey mapping,”** said José Goncalves. **“This networking session allowed us to engage with key partners and reinforce collaboration in adopting innovative solutions.”**

The **MRT Drone Survey Mapping Service** aims to revolutionize mapping and surveying processes in the mining sector. Designed to deliver high-resolution aerial data, it enhances resource exploration and improves decision-making processes.

MRT extends its appreciation to all participants and looks forward to continued collaboration in advancing drone survey technology for industry growth.
